EDUCATION

University of Washington, Seattle *Graduation: June 2025*

Bachelor of Science, Informatics

Data Structures and Algorithms, UX Design, Product and Information Systems Management, Information Ethics and Policy, Data Science Foundations

LANGUAGES & TOOLS

Python	AWS
SQL	TypeScript
React	PySpark
JavaScript	Git
Java	Swift + Swift UI
Power BI	Figma

HARD SKILLS

Cloud Infrastructure as Code	Data Pipeline Engineering (ETL)
Performance Optimization	Backend & Serverless Development
Data Quality Monitoring	AI-Native Development & Agent Tooling
Front-End Development	Least-Privilege Access Design
Testing & QA	User Research + Human-Centered Design
Root-Cause Analysis	Data Structures + Algorithms

SOFT SKILLS

Ownership
CrossTeam Collaboration
Stakeholder Management
Problem Solving
Communication
Leadership

WORK

Software Development Engineer @ Amazon | Seattle, WA *Sep 2025 - Present*

- Cut an executive AI usage dashboard's median load time from **~2 min to under 10s** and errors by **94%**
- Migrated 12 **AWS Glue jobs** from JSON to Parquet, cutting daily runtime from **2-5 hours to 5-10 min**
- Automated user identity resolution (**99.94%** of **~819K** resolved), replacing a lossy manual export
- Sped up a **~650M-record** invoice search from 60s+ timeouts to seconds by removing a full-index sort
- Led root-cause review of a **6-day data outage**; co-built a monitor that flags gaps within **24 hours**
- Built least-privilege **AI agent** tooling that made multi-day manual data backfills self-serve
- Redesigned a license platform's homepage (**7+ pages into one view**) and its top-traffic page

Software Development Engineer Intern @ Amazon | Seattle, WA *Jul 2024 - Sep 2024*

- Rebuilt a macOS app's front end in **Swift** from **user research**, adding device renaming and new layouts
- Enabled **cross-device sync** of account and backup status, removing the need to restart the app
- Designed in **Figma** and built a guided walkthrough covering all features and top user pain points

IT Audit Intern @ Washington State Auditor's Office | Remote *Jun 2023 - Jun 2024*

- Ran audit tests (**CAATs**), building data packages and **Power BI** reports on financial trends
- Extracted and cleaned financial data from PDFs using **Altair Monarch**, **regex**, and **Excel**
- **Coordinated** with external teams and Washington State public entities on data formatting, quality issues, and audit deadlines

PROJECTS & LEADERSHIP

Teaching Assistant: Product and Information Systems Management @ UW | Seattle, WA *Sep 2024 - Mar 2025*

Prepared materials for and **led weekly class sessions** for a class of 35 students. **Graded coursework and exams.**

Web Development: Closetify Link: https://tinyurl.com/closetify *Mar 2024 - Jun 2024*

Designed and created a web app built with **JavaScript, React, CSS, and Firebase authentication** that allows users to manage a virtual wardrobe.

UX Design: Humus Link: https://tinyurl.com/humusdesignchallenge *Jan 2024 - Mar 2024*

Created an app prototype for a cyclic composting collective. Went through the full **User Experience design cycle**. Final prototype in **Figma**.

Women in Informatics (WINFO) Director of Event Operations *Mar 2024 - Mar 2025*

Led **end-to-end planning, budgeting, and promotion** of 2-3 monthly fundraising, professional, recruiting, and community events. **Partnered with external companies** and ran weekly meetings to **scope projects and delegate tasks**.
